Airbnb India – A to Z Website Flow

Sep 30, 2026 · @ECC

Overview

airbnb.co.in ek two-sided marketplace hai: ek taraf **guests** hain jo rehne ki jagah, experiences aur services book karte hain, aur doosri taraf **hosts** hain jo inhe list karke kamaate hain. Airbnb beech me platform, payment aur protection (AirCover) deta hai. Booking hone par contract seedha guest aur host ke beech banta hai, aur payment Airbnb Payments ke through hota hai.

Site ke 4 main modules:

Module	Guest kya karta hai	Host kya karta hai	Main path
Homes (Stays)	Ghar, flat ya villa raat ke hisaab se book karta hai	Property list karta hai, price aur calendar set karta hai	`/homes`, `/rooms/:id`
Experiences	Local activities book karta hai (food tours, cooking, art workshops, cultural tours)	Activity host karta hai	`/experiences`
Services	Chef, photographer, massage jaisi services book karta hai	Service offer karta hai	`/services`
Hosting	–	Listing banata hai, reservations aur payouts manage karta hai	`/host/homes`, `/become-a-host`

India site par default language English (IN) aur currency ₹ INR hai. Dono footer se badle ja sakte hain.

Site map

Site ke pages 5 groups me bante hain: browse, booking, account, hosting aur support. Jin paths ke aage "(app)" likha hai, wo login ke baad dikhte hain. Unka structure Airbnb ke standard behaviour ke hisaab se likha hai (approximate), kyunki login wale pages bahar se fetch nahi ho sakte.

Group	Page	Path
Browse	Homepage (All tab)	`/`
Browse	Homes, Experiences, Services tabs	`/homes`, `/experiences`, `/services`
Browse	Search results (list + map)	`/s/<place>/homes`, `/s/<place>/services`
Browse	Destination pages (SEO)	jaise `/kyoto-japan/stays/apartments`
Booking	Listing detail	`/rooms/<id>`, `/experiences/<id>`, `/services/<id>`
Booking	Checkout / confirm and pay	`/book/stays/<id>` (app)
Account	Login or sign up (modal)	homepage par modal khulta hai
Account	Wishlists, Trips, Messages, Profile, Account settings	`/wishlists`, `/trips`, `/guest/inbox`, `/users/show/<id>`, `/account-settings` (app)
Hosting	Host landing + earnings estimator	`/host/homes`
Hosting	Listing creation wizard	`/become-a-host`
Hosting	Host dashboard (Today, Calendar, Listings, Messages)	`/hosting` (app)
Hosting	AirCover for hosts, Co-hosts, Referral	`/aircover-for-hosts`, `/host/co-hosts`, `/refer`
Support	Help Centre + articles	`/help`, `/help/article/<id>`
Support	AirCover for guests	`/aircover`
Legal	Terms, Privacy	`/terms`, `/privacy_policy`

Homepage breakdown

Homepage ka ek hi kaam hai: user ko jaldi se search karwana ya kisi listing card par click karwana. Upar se neeche tak ye parts hain:

Part	Kya dikhta hai	Kya karta hai
Logo	Airbnb logo	Homepage par wapas le jaata hai

Part	Kya dikhta hai	Kya karta hai
Category tabs	All, Homes, Experiences, Services (icons ke saath)	Search aur neeche ka content us module ke hisaab se badal deta hai
Search bar	**Where** (jagah), **When** (dates, "Add dates"), **Who** (guests, "Add guests") + search button	Har field par click karne se dropdown khulta hai: jagah ke suggestions, calendar, aur adults/children/infants/pets ke counters. Search karne par results page khulta hai
Become a host	Menu	Home, experience ya service list karne ke flow par le jaata hai
Globe icon	Language aur currency	English (IN), ₹ INR badalne ka modal
User menu	Help Centre, "Log in or sign up"	Login/signup modal kholta hai; login ke baad Wishlists, Trips, Messages, Profile dikhte hain
Listing rows	Jaise "Guest favourite homes in North Goa", 8 cards	Har card par photo, property type + jagah, 2 raaton ka price (₹9,000 se ₹21,000), rating (4.88 se 5.0), "Guest favourite" badge aur wishlist ka dil. Click karne par listing page khulta hai
Experiences row	Cultural tours, Landmarks, Art workshops, Food tours, Cooking	Experiences ki category par le jaata hai
Footer	Support, Hosting, Airbnb, destination links	Help Centre, AirCover, cancellation options, host resources, careers, news, aur SEO destination pages

Listing rows ki jagah user ki location ke hisaab se badalti hai. Fetch ke waqt North Goa dikh raha tha, Experiences page par Jaipur.

Guest booking flow

Guest ka safar 8 steps me hota hai, search se lekar review tak. Login step 5 tak zaroori nahi hai; browse aur search bina account ke ho jaata hai.

1. **Search:** Homepage par Where, When aur Who bharta hai, ya kisi category ya listing card par click karta hai.
2. **Results page:** Ek taraf listings ki grid, doosri taraf map par price pins dikhte hain. Map ko hilane par results update hote hain.

    - Filters: price range, type of place (poora ghar ya room), bedrooms/beds/bathrooms, amenities, Instant Book, Guest favourite, property type.
    - Results relevance, price, availability, reviews aur cancellation history ke hisaab se rank hote hain (Terms).
3. **Listing detail:** Photos, amenities, reviews, map, rules padhta hai, aur side panel me dates aur guests chunkar total price dekhta hai (details neeche wale section me).
4. **Reserve:** "Reserve" button dabata hai. Isse pehle koi paisa nahi katta.
5. **Login/signup:** Agar login nahi hai to yahin modal khulta hai.
6. **Confirm and pay:** Trip details (dates, guests), payment method (card, UPI, net banking), price breakdown (nightly price × raatein + cleaning fee + service fee + taxes) aur cancellation policy dikhti hai. Pehli booking par host ko ek message aur phone ya ID verification bhi maanga ja sakta hai.
7. **Booking ka type:**
    - **Instant Book:** booking turant confirm ho jaati hai.
    - **Request to Book:** host ke paas 24 ghante hote hain accept ya decline karne ke liye. Tab tak payment hold par rehta hai.
8. **Trip confirmed:** Confirmation email aur notification aata hai, aur booking Trips me dikhne lagti hai. Check-in se pehle exact address aur check-in instructions milte hain. Guest aur host Messages me baat karte hain. Checkout ke baad dono ek doosre ko review dete hain.

Booking hote hi guest aur host ke beech seedha contract ban jaata hai, aur Airbnb Payments paisa collect karke host ko payout karta hai (Terms). Instant Book, 24 ghante aur payment methods wali baatein Airbnb ke general behaviour se hain, is fetch se confirm nahi hui.

Listing detail page

Listing page (`/rooms/<id>`) wo jagah hai jahan guest booking ka faisla leta hai. Isliye upar photos aur neeche trust dene wali cheezein hoti hain, aur booking panel scroll karte waqt bhi dikhta rehta hai. Page ka layout Airbnb ke standard pattern par hai (approximate):

Part	Content
Header	Title, rating, reviews ki ginti, jagah, Share aur Save (wishlist) buttons
Photo gallery	5 photos ka grid, "Show all photos" se poori gallery room ke hisaab se

Part	Content
Summary	Property type, guests, bedrooms, beds, bathrooms; "Guest favourite" ya Superhost badge
Host card	Host ka naam, photo, kitne saal se host hain, Superhost status
Highlights	Jaise self check-in, free cancellation, achhi location
Description	Host ki likhi details, "Show more" ke saath
Sleeping arrangements	Har bedroom me kaunsa bed hai
Amenities	Wifi, kitchen, AC, parking, pool; "Show all amenities"
Calendar	Available aur blocked dates, minimum stay
Booking panel (sticky)	Price per night, check-in/check-out, guests, "Reserve" button, price breakdown, "You won't be charged yet"
Reviews	Overall rating, category ratings (cleanliness, accuracy, check-in, communication, location, value) aur review cards
Location	Map par area (booking se pehle exact address nahi)
Things to know	House rules (check-in time, pets, parties), safety and property, cancellation policy
Report listing	Galat listing report karne ka link

Login aur account flow

Login aur signup ek hi modal me hote hain ("Log in or sign up"). System khud dekhta hai ki account pehle se hai ya naya banana hai. Neeche ka flow Airbnb ke standard behaviour par hai (approximate):

1. User phone number (country code +91) daalta hai, ya Email, Google, Apple ya Facebook se continue karta hai.
2. Phone par OTP aata hai aur user use verify karta hai.
3. Naya user ho to naam, date of birth (18+ hona zaroori) aur email bharta hai, aur terms accept karta hai.
4. Login ke baad user menu me ye pages khulte hain:

Page	Kya hota hai
Wishlists	Dil dabakar save ki gayi listings ki lists
Trips	Aane wali aur purani bookings; cancel ya change karna
Messages	Host ke saath chat, booking requests
Notifications	Booking, message aur promotion alerts
Profile	Photo, bio, identity verification, milne wale reviews
Account settings	Personal info, login and security, payments and payouts, taxes, notifications, privacy, language/currency

Host flow

Host banne ka raasta /host/homes se shuru hota hai. Listing banana free hai, price host khud set karta hai, aur Airbnb apni fee payment ke baad kaatta hai.

Landing page par kya hai:

- **Earnings estimator:** raaton ki ginti ka slider, jisse andaza lagta hai ki host kitna kama sakta hai.
- **Get started** button, jo `/become-a-host` wizard par le jaata hai.
- **AirCover for hosts:** $3M USD tak damage protection, $1M USD tak liability insurance, 24 ghante ki safety line aur guest identity verification.
- **Ask a Superhost** (`/askasuperhost`), specialist se baat, free hosting classes, co-host network (`/host/co-hosts`) aur referral (`/refer`).

Listing wizard ke steps (Airbnb ke standard wizard par, approximate):

1. Property type (house, flat, villa, guesthouse) aur guest ko kya milega (poora ghar, private room ya shared room).
2. Location (address aur map pin) aur basics (guests, bedrooms, beds, bathrooms).
3. Amenities chunna aur kam se kam 5 photos upload karna.
4. Title aur description likhna.
5. Booking settings (Instant Book ya har request approve karna), nightly price aur discounts.
6. Safety details, review, phir **Publish**.

Publish ke baad host dashboard (`/hosting`): Today (aaj ke check-in/check-out), Calendar (dates block karna, price badalna), Listings (edit karna), Messages (guests se baat, requests accept ya decline karna), Earnings aur payouts (bank details, booking ke baad payout), Insights aur reviews.

Experiences aur Services

Dono module Homes jaise hi chalte hain (search, card, detail, book), bas inme raat ki jagah **time slot** book hota hai aur price **per guest ya per group** hota hai.

	Experiences (/experiences)	Services (/services)
Kya hai	Local host ke saath activity	Professional ki service, aksar aapki jagah par
Categories	Cultural tours, Landmarks, Art workshops, Food tours, Cooking, Airbnb Originals	Photography, Wellness (massage, yoga, fitness, skincare), Chefs, Grooming (hair, makeup)
Page ke rows	Happening today, Tomorrow, This weekend (user ke shehar me, jaise Jaipur)	Shehar ke hisaab se (jaise `/s/Jaipur/services`)
Card par	Photo, title, start time (jaise 2:30 pm), ₹ price per guest, rating, location	Photo, title, provider ka naam, "From ₹X / guest" ya "/ group", minimum booking, rating, "Popular" badge
Booking	Date aur time slot chunna, guests (adults, children, infants), phir pay	Date aur time chunna, service ka option, phir pay
Host ka raasta	"Airbnb your experience"	"Airbnb your service"

Support, safety aur policies

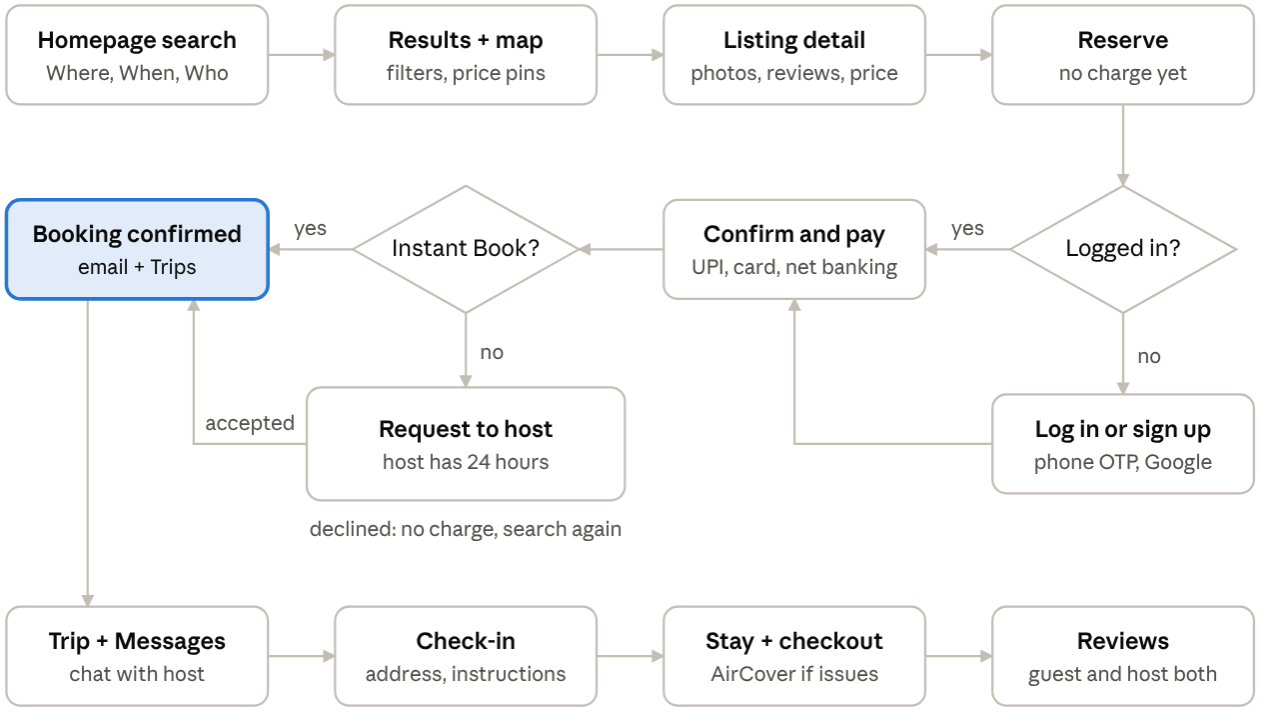

Trust ko 4 cheezein sambhalti hain: AirCover, Help Centre, cancellation policies aur reviews.

- **AirCover for guests:** har home booking ke saath milta hai.
  - *Booking protection:* host check-in se pehle cancel kar de, host se contact na ho paaye, ya listing bataye gaye se bahut alag nikle.
  - *Check-in guarantee:* check-in hi na ho paaye ya bade issues hon (jaise listing me bataye gaye se kam bedrooms).

  - *Get what you booked:* Airbnb milti-julti jagah dhoondhta hai, ya poora ya thoda refund deta hai.
  - *24 ghante ki safety line:* trained safety agents, jo zaroorat par local emergency services se bhi jodte hain.
  - Cover nahi hota: chhote issues (jaise kharab appliance) aur travel ki problems (jaise flight delay).
- Help Centre: articles, safety issue report karna, accessibility, cancellation options aur neighbourhood concern.
- **Cancellation policy:** har listing ki apni policy hoti hai (jaise Flexible, Moderate, Strict). Ye listing page aur checkout par dikhti hai aur tay karti hai ki refund kitna milega (policy ke naam approximate hain).
- **Reviews:** checkout ke baad guest aur host dono review likhte hain. Guest ke reviews se listing ki rating aur "Guest favourite" badge banta hai.

End-to-end flow diagram

Search se review tak: booking Instant Book ya host ki haan se confirm hoti hai

guest journey · 13 steps, 2 decisions

Login sirf Reserve ke baad maanga jaata hai. Instant Book wali listing turant confirm hoti hai, baaki me host ki haan chahiye.

Aapke clone project ke liye notes

Aapke React project me browse wale pages ban chuke hain. Abhi booking, login, account aur hosting wale pages baaki hain. Ye list `src/App.jsx` ke routes se banayi hai:

Airbnb ka page	Aapke project me	Status
Homepage	`/` → `Home.jsx`, `/home` → `HomeSecond.jsx`	Bana hai
Experiences, Services	`/experiences`, `/services`	Bana hai
Listing detail	`/listing/:id` → `ListingDetails.jsx`	Bana hai
Experience detail	`/experience/:id` → `ExperienceDetails.jsx`	Bana hai
Header, Footer	`Header.jsx`, `Footer.jsx`, `Layout.jsx`	Bana hai
Search results + map	–	Baaki
Service detail	–	Baaki
Login/signup modal	–	Baaki
Confirm and pay (checkout)	–	Baaki
Wishlists, Trips, Messages, Profile	–	Baaki
Become a host wizard + host dashboard	–	Baaki

Kis order me banayein: pehle search results, phir checkout, phir login, phir wishlists aur trips. Isse guest ka poora booking flow chal jaayega. Hosting sabse aakhir me banaiye.

Basic data models:

- `User`: id, name, email, phone, avatar, isHost, isSuperhost, verified
- `Listing`: id, hostId, type (home/experience/service), title, description, location (city, lat, lng), photos[], amenities[], price, maxGuests, bedrooms, beds, baths, rules, cancellationPolicy, instantBook, rating, reviewCount
- `Availability`: listingId, date ya timeSlot, isBlocked, price
- `Booking`: id, listingId, guestId, checkIn, checkOut ya slot, guests {adults, children, infants, pets}, priceBreakdown, status (pending/confirmed/cancelled/completed)

- `Review`: bookingId, authorId, targetId, ratings (cleanliness, accuracy, check-in, communication, location, value), text
- `Wishlist`: userId, name, listingIds[]
- `Message`: threadId, bookingId, senderId, text, createdAt
